- **Wool Roving:** Wool roving is the raw material used for needle felting, available in a variety of colors and textures.
- **Foam Block or Work Surface:** A firm surface to work on, providing support and preventing your needles from breaking.
- **Scissors:** For trimming and shaping your creations.

- **Optional:** Felting Mat, Thimble, Needle Holder

Step-by-Step Guide to Needle Felting

1. Preparation: Choose your design and gather your materials. Prepare your wool roving by pulling it into small pieces.

2. Basic Shaping: Use your needle to poke the wool fibers repeatedly, entangling them and forming a basic shape. Continue poking until you achieve the desired size and form.

3. Detailing: Once you have the basic shape, add details by poking specific areas more densely. You can create textures, features, and embellishments by varying the angle and pressure of your needle.

4. Finishing: Smooth out any rough edges or uneven areas by gently poking the surface. Use scissors to trim excess wool if necessary.
