

# Prepare for the Unthinkable: Civil-Military Preparedness for an Electromagnetic Pulse Catastrophe

An electromagnetic pulse (EMP) is a sudden and intense burst of electromagnetic energy that can disable or destroy electronic devices. It can be caused by natural events, such as solar storms, or by man-made events, such as nuclear explosions. An EMP attack could cripple our nation's critical infrastructure, including power grids, communications networks, and transportation systems. It could also render our military forces ineffective.

The consequences of an EMP catastrophe would be devastating. Without electricity, we would lose access to food, water, and medical care. We would also be unable to communicate with each other or with the outside world. Our economy would collapse, and our way of life would be irrevocably changed.

## Civil-Military Preparedness For An Electromagnetic Pulse Catastrophe by Neil S. Glickman

The good news is that we can prepare for an EMP catastrophe. By taking steps now, we can minimize the damage and help our communities recover.

## **Civil Preparedness**

There are a number of things that civilians can do to prepare for an EMP catastrophe. These include:

- \* Stockpiling food, water, and medical supplies
- \* Having a plan for communication and evacuation
- \* Learning basic survival skills
- \* Identifying local resources that can be used in an emergency

Civilians should also work with their local governments to develop emergency plans and to identify resources that can be used in an EMP catastrophe.

## **Military Preparedness**

The military also has a role to play in preparing for an EMP catastrophe. The military can:

- \* Develop and deploy EMP-resistant technologies
- \* Train troops on how to operate in an EMP environment
- \* Develop plans for responding to an EMP attack

The military can also work with civilian authorities to develop joint plans for responding to an EMP catastrophe.

## Working Together

Civil and military preparedness are both essential for ensuring the survival and recovery of our nation from an EMP catastrophe. By working together, we can minimize the damage and help our communities recover.

An EMP catastrophe is a serious threat to our nation. However, by taking steps now, we can prepare for this threat and minimize the damage. Civil and military preparedness are both essential for ensuring the survival and recovery of our nation.

## Free Download Your Copy Today!

To learn more about how to prepare for an EMP catastrophe, Free Download your copy of Civil-Military Preparedness for an Electromagnetic Pulse Catastrophe today. This comprehensive book provides actionable steps for civil and military leaders to ensure the survival and recovery of our nation.
